## About us

Sepanta Health Corporation, located at Isfahan Science and Technology Town, consists of 18 knowledge-based companies. Member companies are active in the field of high technology products in the following four main areas:

- Medical Equipment
- Pharmaceutical and cosmetic industries
- Food industry
- Technical and IT support

■ Sepanta Health Corporation has become a well-known and trustable source of supply for a wide range of high-tech products in the field of health-related products. Sepanta Health Corporation engages in major projects of medical, pharmaceutical, cosmetics, and food industry.

■ The collective and united movement of technology and innovative companies such as Sepanta Health Corporation towards creating knowledge and achieving customer satisfaction is a valuable movement.

■ Sepanta Health Corporation's competitive advantages comprise of having a comprehensive product portfolio, a strong supply chain, and superiority in technology and initiative, to mention a few

Our most prominent goals include achieving up-to-date knowledge, producing high-tech products, and cooperating with international partners all around the world.

■ Sepanta Health Corporation is a member of the Association of Knowledge-Based Companies and has the support of Isfahan Science and Technology Town as well as the Presidential Innovation and Prosperity Fund.

## Missions of Sepanta health Corporation

- Aggregation of powerful technology-based companies in the field of medical equipment, food industry, and pharmaceutical and cosmetic industries
- Uniting the abilities and capacities of member companies to achieve a proper place in international market
- Creating synergies between knowledge-based companies in order to produce high-tech health-related products
- Supporting ideas and projects in the field of health technology
- Value creation for both the stakeholders and society

High-tech companies active in the field of production of medical equipment and hospital supplies

# Amvaj Negar Sepahan

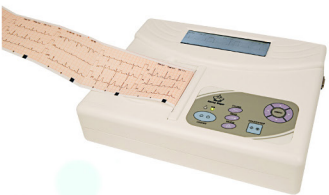

Amvaj Negar Sepahan as Knowledge Base Company was founded in 2009 with the goal of research, design and manufacturing of electronic medical devices. This company tries to design and produce different devices based on the technologies, world standards and the needs of physicians and specialists.

Amvaj Negar Sepahan got the certificate of production from Iran medical equipment department in 2011. The company succeeded in receiving the ISO13485 quality management system certification in 2019 and the CE mark for electrocardiography products in 2020. Now, this company is independent manufacturer variety of Electrocardiographs and also vital signs simulators.

## ■ Products:

3Channels Electrocardiograph, Model: C80

3Channels Electrocardiograph, Model: Negar A80

6Channels Electrocardiograph, Model: Negar A110

Accessories

ECG & Resp & Pace Simulator, Model: ANSIM-12

ECG Simulator, Model: Simple-12

PC Based Electrocardiograph, Model: PC216

## **behyaar** Behyaar sanat Sepahan

Behyaar Sanat Sepahan, a knowledge-enterprise company with R&D system, has been servicing in industrial and medical equipments since 1999. Today, more than 550 engineers and other specialists are employed at the company. We started our service with designing and producing the first Iranian qualified hospital transporter at 1999. Since then we have been manufacturing above 80 products. We cover a huge range of medical devices like hospital furniture, surgical tables, surgical LED lights and high-tech products.

In 2009, we augmented some experts in order to construct our R&D team. As the result of this attention to power of knowledge and R&D experts, we manufactured the first Iranian surgical LED lights, the first Iranian C-arm beds using carbon fibers composit, electrical surgical beds and some high-tech products such as medical linear accelerator for cancer treatment, digital radiology device, multi-slice CT-scan system and Dosimetry equipments for radiotherapy.

### ■ Products

#### Radiotherapy

##### OMID 6MV Single Energy

##### OMID Medical Linear Accelerator

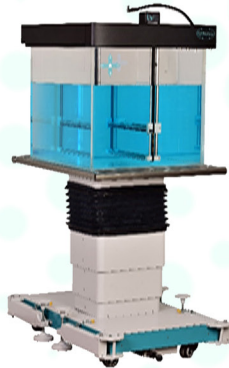

Behyaar company is honored to introduce OMID LINAC as a state-of-the-art medical linear accelerator to oncology centers. OMID LINAC helps more and more centers to gain the confidence to move towards advanced radiation treatment techniques. OMID LINAC has cost effective design and it is the gateway to modern RT for oncology centers that need to start small and an ideal replacement for cobalt technology. It is simple to operate, robust, allowing more patients to be treated quickly and effectively.

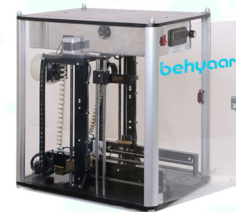

## Radiotherapy

### ■ Behyaar 3D Water Phantom

The Behyaar 3D water phantom system, is intended for radiotherapy dosimetry measurements. The acquired data could be used for LINAC acceptance testing, TPS beam data commissioning, monitor calibration and accelerator QA.

# Medical Equipment

## FapSCO

Active in the field of medical equipment production, Hospital suction, Smart vacuum therapy.

### ■ Products:

#### ■ Vacuum therapy device model VACUUMED V.A.C The "FAPSCO"

Vacuum therapy device creates a constant and controlled negative pressure from zero to 200 mm HG. By using foam and creating a closed vacuum environment with the help of transparent and sticky film dressing and silicone drain, the negative pressure is transferred to the wound surface and finally the wound secretions are collected in the tank connected to the device.

- Equipped with intelligent alarm system and LCD display
- Has a tank of 500 cc .
- Has an adapter and battery.

Has three working modes: Continuous, intermittent and dynamic

More than 15 years of experience in the production of vacuum devices , vacuum therapy and essentials

#### ■ HyperMid smart vacuum therapy

- Has three working modes: continuous, intermittent, dynamic. And painless procedure in all working modes.
- Portable and light-weight, 2.3-inch touch screen.

Dimensions of the device: 18\* 15 \* 8 cm.

- Equipped with alarm sending and system troubleshooter, leakage and blockage warning system and tank filling alert.

2.5KG

Light-weight and quiet, 7-hour charging.

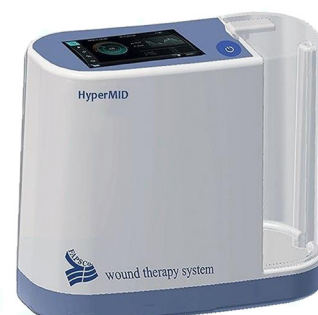

Tank volume: 750 cc

#### ■ Hyper model smart vacuum therapy

- working modes: continuous, intermittent, dynamic and advanced dynamic, equipped with a painless It has four system in all working modes.
- 7-inch touch screen, Wi-Fi connectivity with tracking system and GPS.
- Equipped with alarm sending and system troubleshooter ,leakage and blockage warning system and tank filling alert.

1 KG

Light and quiet, 15-hour charge. Tank volume: 500 cc

Masstec Medical Co. is a medical device manufacturing company, founded in 2013. Direct supervision of prominent physicians and participation of expert engineers have helped Masstec Medical gain a deep understanding of physicians' in-action challenges while easing the difficulties patients walk through. Today, we are proudly Iran's first producer of magnetic drapes and biopsy needles and are among the leading producers of gynecology catheters.

## ■ Products:

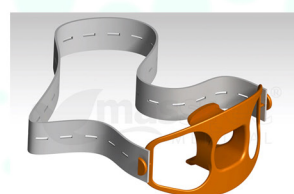

- Emergency Face Shield Covid-19-Protection

- Hysterometer Gynecology

- Endoscopic Bite Block Gastroenterology

- Colon Hydrotherapy Device Gastroenterology

- Bone Marrow Biopsy Needle Biopsy Needles

- Intrauterine Insemination Catheter Gynecology

- Atracta Surgery

- Endometrial Suction Curette Gynecology

## Teb Tajhiz Paya

Paya Tajhiz Teb Engineering Company was established in 2008 and introduced itself as the first manufacturer of advanced medical equipment in wound healing to the country's medical system by producing the first generation of negative pressure devices (NPWT). Paya Tajhiz Teb Engineering Company was able to make this method one of the most effective ways of wound healing in the world, which was previously only in the hands of large companies in the United States and some European countries.

Now, Paya Tajhiz Teb Engineering Company has achieved the success of producing the best and most diverse NPWT devices in the world in various models and applications along with the relevant accessories in the shortest time and breaking the monopoly of large American and European companies.

### ■ Products:

- Simplex II wound vacuum therapy device
- Grandis Wound Vacuum Therapy Device

- Simplex III Wound Vacuum Therapy Device

- Grandis Sigma Wound Vacuum Therapy Device

- iSimplex Wound Vacuum Therapy Device

- Integro Wound Vacuum Therapy Device

- Integro+ Wound Vacuum Therapy Device

Yekta Sanat Naji Hardware and Software Company, one of the knowledge-based companies located in SheikhBahaie Science and Technology Park of Isfahan University of Technology, was established in 2011 And has started to operate by using committed and specialized staff in the field of manufacturing equipment with ultrasonic technology. During these years, the company with its growing trend has tried to produce products with Iranian design to eliminate the country's need for various medical products. This company succeeded in producing the first professional ultrasound device in the country in 2016, and so far it has been able to achieve an ultrasound device with animal, human and educational use.

## ■ Products:

## Behyaar Sanaat Sepahan

Behyaar Sanaat Sepahan was founded in 1999 with only a handful of people. However, it has grown to be a leading company in manufacturing industrial and medical equipment in Iran. Relying on the knowledge and abilities of the youth, Behyaar Sanaat is aiming to create a brighter and more hopeful future for people. Currently, around 500 employees located at Isfahan Science and Technology Town, implement their knowledge and expertise to build more than 80 products, including medical linear accelerator for cancer treatment, CT scanners, digital radiography devices, and airport scanners.

Behyaar Zist, our biotechnology branch was established in 2019. It started with the research and development for various biotechnological, medical, and cosmetic products including vaccines, molecular kits, enzymes, keratin, collagen, gelatin. Today, we have successfully produced Plasmid Purification Kit, DNA ladder, keratin, protease, permanent marker for ear tags, to name a few.

### ■ Products:

#### ■ Keratin

#### ■ High Purity Plasmid Purification Kit

#### ■ Collagen

#### ■ Ear tag permanent marker

#### ■ Fish oil

#### ■ DNA ladder

#### ■ RNA extraction kit

#### ■ gelatin

Salamat Azin Parsian Company abbreviated as SAP, has been integrating science and nature to produce natural cosmetic products. Based on the knowledge and experience of its managers, SAP is proud to produce the best quality cosmetics based on the natural products with traditional medicine approach in Iran.

## Amazing leech oil properties

In summary, the amazing properties of leech oil, which are included in various studies, are as follows: Preventing premature aging and reducing wrinkles, rejuvenating and smoothing the skin, reducing frown and laugh lines, tightening and enlarging the breasts, enlarging the male vital tool (PENIS), increasing the vitality of men and overcoming frigidity in women, muscle mass increasing for athletes, highlighting the cheek without the need for fat injection, buttock enlargement and tightening wrinkly stomach after pregnancy

## ■ Products:

The main cosmetic products of SAP are based on the leech and its products including leech oil. Several studies have shown that the extracted oil from the leech accelerates blood flow to some organs of the body and leads to enlarging them, which is used in traditional medicine to increase muscle growth. Nowadays, its amazing effects are known and can be a good alternative to chemical creams and Botox. In fact, leech oil is absorbed through the skin by massaging, therefore the living cells are constantly reproducing to replace the dead cells.

The following products are provided by SAP:

- Cosmetics packages for men and women
- Special enlargement packages for men and women

High-tech companies active in the field of production of organic, enriched and ...

# kamvar

- Syrup saffron
- Natural food flavors (powder and liquid)
- Food emulsifier and stabilizer systems
- Flavor emulsions group

## Hamandishan Avian Tak (HAT)

Hamandishan-Avian-Tak (HAT) Company was established in 2016. It is a technology company where located in Isfahan Scientific and Technology Town (ISTT). This company is supported by studies results during three decades which achieved in the Agricultural Research, Education and Extension Organization (AREEO). In order to commercialize technology products. The initial goal and main focus of research and development (R&D) group of the company is to promote the quality and innovation in livestock, poultry and bee products and also aquatic animals regards to indigenous and domestic genetic resources in order to develop the knowledge-based of these valuable resources.

### ■ Products:

#### ■ Egg enriched with folic acid:

This kind of enriched egg was commercially introduced to the Iranian market by H.A.T Company for the first time. The folate content in this egg is the natural type (5-methyl tetrahydrofolate) with 2 to 4 times more than ordinary eggs. This valuable food resource is available and cheap, and also useful for all age groups, especially pregnant women, children and cardiovascular patients that can provide the required daily folate with availability of more than 95% without any side effects (tablets Folic acid).

#### ■ Meat and Egg of indigenous hens:

The Company according to its scientific researchers and extensive studies on the potential production and quality of native poultry products has presented a project entitled "value chain plan in the development and breeding of native chickens." We are proud to offer enriched and healthy local meat and eggs, to the consumer market for the first time with a special brand along with Veterinary Organization license. In addition, these products are produced in completely hygienic conditions that confirmed by relative organizations.

#### ■ Leech survival and transportation environment:

In parallel with the development and promotion of traditional medicine and the growing popularity of people with ancient medicine, the company's specialists in order to promote personal health and safety for the first time in the leech industry has succeeded in producing a biological bed and special environment for leeches. This bed and survival environment, by using special and biological technology, has provided the possibility of preserving and keeping the leeches alive for several months in sterile conditions and has a patent certificate. We are proud to be the first and only collection that is able to offer certified medical leeches and sealed packaging with the ability to survive long in the country. Certainly, this technology will be a step towards the growth and safety of medical leeches in the field of community health, as well as the preservation, reproduction and export of valuable species of Iranian leeches.

# Istaghband

The first goal of the company is to achieve human health through proper nutrition of plant products, especially those that can be produced organically. Carla can be produced organically for three reasons: low expectation of fertilizers, growth and production in very hot and humid conditions, and the presence of compounds that have antimicrobial and bacterial and viral properties prevent the growth and outbreak of pests and diseases. Therefore, the company has not used any detoxifying agent during the production period and has also used biological fertilizers.

At present, the company produces Carla powder, which is recommended to be consumed as a herbal tea. Now, in a few countries, the products of this plant are also produced in the form of tablets and capsules and exported to other countries.

## ■ Products:

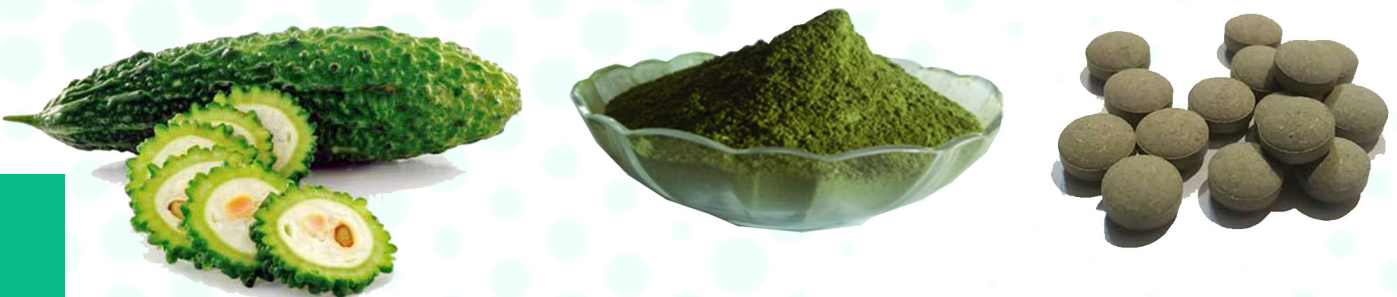

### ■ Carla: (Bitter melon) The miraculous reduction in blood sugar and diabetes

The one-year-old plant is from the Pumpkin family and is native to the tropical regions of East Asia. Carla looks like a cucumber with a congressional surface, like a lizard's skin and tastes bitter. It also has international codex and pharmacology; all its components such as root, stem, leaf, fruit and egg have many nutritional and medicinal uses, but the most important medicinal use of this plant for diabetes is its ability to reduce blood sugar and therapeutically Attention. Due to the bitterness of the fruit, its freshness is not welcome, although it may be used in pickles.

The final product of this plant is now being manufactured in powder form by packaging in various forms at the Agricultural Development Center of Isfahan Scientific Research Center of Isfahan, in the near future by obtaining the necessary licenses in the form of capsules and The pills will also be packaged and distributed.

**Dosage:** Bound sugar between one to two grams and for higher sugars 3 to 5 grams in half to one tablespoon of boiling water and consumed nights after meals after meals, if previously used sugar reduction pills. People with hypoglycemia (hypoglycemia), favism (fever bean) and pregnant women should not take it.

**Main Features:** Miraculously lowering blood sugar and curing diabetes, activating lipid enzymes, killing bacteria, viruses and cancer cells, preventing the growth of tumors and prostate, lowering blood pressure and body temperature, lowering cholesterol  
**2-Sub-properties:** treatment of arthritis, raising milk flow, blood cleanser, poisoning relievers, removing internal worms and parasites, balancing hormones, boosting immunity ,hair root booster

## Kooze Asal Aria Ravis

## Niko Dadeh Zigoorat

It was in 2017 that Nicode was created by a few programming enthusiasts. We mean Nicode, like everyone who loves themselves or their company, to develop and grows every day, we wanted this to happen as soon as possible, But we soon realized that just having a big dream is not enough. And that means the beginning of hard and busy days. By completing our team with creative and passionate people, we all decided to focus on what we know and get as much experience as we can. It was hard, it took time, a lot of things happened, but we finally got to the dream that we had come together for. And now, after 12 years, we are standing where we can confidently do every project in programming, digital marketing and design. Digital marketing is the same as marketing, but on the internet!

We are responsible for your dreams We are a knowledge-based company setting up and boosting online businesses. Our company is a group of creative, experienced, young people using the latest technologies and methods to reach a specific goal. Since 2017, Nicode is helping people to build what they have in mind (in technology and IT fields) and benefit from it the way they have dreamt. Please think of us as a member of your team, using our potentials to reach results that make a change.

In Digital Age, Nicode creates, develops, and supports online businesses by investing in "Software Development" and "Digital Marketing" units. All stages of starting any businesses or online startups, from analysis and planning, design and prototyping, development, testing, deployment, maintenance and updates, branding, digital marketing, content creation for social media, etc., are done by Nicode team in the best possible way.

A work well begun is half done

The ticket to enter the world of online businesses is to have a website or application, a GOOD one. If you don't offer a good user experience to everyone who visits your site or application, this will probably be the last time they call you, even though you may have the best product or service in the world. Everything depends on this very first time.

There is where you should make a difference and let the customers know that you are different. How is this going to happen? By having a different in a good way website and application. Who can help you reach this? Interested experts have a lot of experience and have worked in this field for many years. Our creative, talented teammates in Nicode can help anyone who is looking for a successful online business in all of the noted areas.

### ■ Activities

- Mobile application design and development (iOS and Android)
- Website design and development (Blog, ecommerce etc.)
- WhatsApp and Telegram chatbot development
- Domain registration
- Web hosting services
